Motivated and analytical software engineer with 10+ years of experience in fast paced challenging environments. Effective and proven track record of organizational effectiveness, critical thinking, idea generation and optimizing efficiencies.

## PROFESSIONAL EXPERIENCE

**GoodRx** | **Sr SDET** (2019 - PRESENT) | Los Angeles

- Developed frontend automation tools with Playwright supporting NextJS applications and instrument apps(mocking props) for integration UI tests.
- Collaborated with teams to shift left testing by enabling 100% developer contributed tests across all test phases enabling faster development cycles.
- Built and optimized CI/CD pipelines to maintain optimal deployment cycles from first commit to production under ~40 minutes.
- Enhanced test reporting with hosted HTML reports, added telemetry to test suites to improve test health(>90%) monitoring.
- Supported squad SDETs to average test runtime under 60 seconds with test telemetry data.
- Packaged Playwright as node module with internal tooling setup out of the box to support micro frontend applications with zero to minimal effort.
- Published private node modules for utilities - identify new tests, create test data, fetch verification codes from email/sms accounts.
- Developed chrome extension to support validation across account based functionalities.
- Created and published GoLang CLI with supporting APIs and lambda functions saving 200%+ time for test data creation.
- Built and maintained test automation framework with Python, Behave(BDD), Selenium/Appium, RestAPI & Jenkins and with XCUI tests for iOS native application.

**Cognizant** | **Automation Engineer** (2019) | Indianapolis

- Created and maintained a scalable test framework for web and API automation tests (Java, Selenium, Extent reports).
- Integrated test executions in CI(Jenkins) with automated reporting.
- Built integrations with JIRA to monitor test cycles with existing test plans.
- Supported multiple frontend and backend teams for automation capabilities.

**Tech Mahindra** | **Software Engineer** (2011 - 2019) | St. Louis

- Developed test automation solution with Java, Selenium for CMS application.
- Prepared test plans and scenarios for EXACT applications for Telecom domain.
- Supported and developed Dot Net applications mitigating from legacy ASP applications.
- Created Ad-hoc reporting from lubricant sales data and worked with DBAs and support teams on application migrations.

## SKILLS

**Technical Skills** | Developer Productivity Engineering | NodeJS | Typescript | Python | GoLang | Playwright | NextJS | Selenium | Swift - XCUI Tests

**Tools** | Datadog | Codefresh | Github | Jenkins | AWS API Gateway | AWS Serverless

## EDUCATION

Bachelor of Engineering | 2007 - 2011 | Anna University, Chennai, India
